

**e-Notice: 33/2025-26**

4.6.2026

To: Parents / Guardians,

**Suspected Outbreak of Influenza-like Illness**

Please be informed that there is a suspected outbreak of influenza-like illness in the school as a number of students (particularly in Class 2D) suffer from fever and have influenza-like symptoms. Cases have been reported to the Centre for Health Protection which will conduct medical surveillance. Parents of 2D should prepare face masks and encourage your child to wear one whenever necessary.

It is important to heighten vigilance and take proper personal protection measures as infectious diseases can be easily spread among children through daily contacts. Therefore, students with influenza-like symptoms should seek medical advice as soon as possible to prevent complications. Parents should take note of their children's health condition, and take their body temperature daily. Students with fever (oral temperature higher than 37.5°C, or ear temperature higher than 38°C), regardless of the presence of respiratory symptoms, should not be allowed to attend school. They should refrain from school until at least 48 hours after their fever is gone.

Thank you for your attention and co-operation.

(Ms CHUI Sau-man)  
Headmistress
